

# PART 1

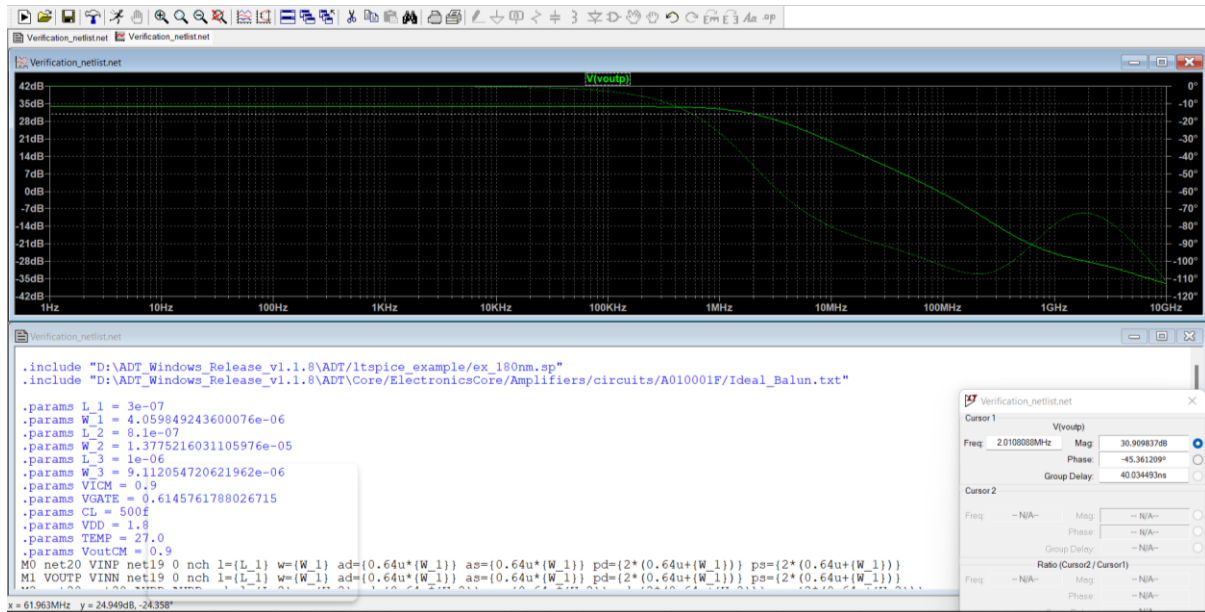

## Question1:

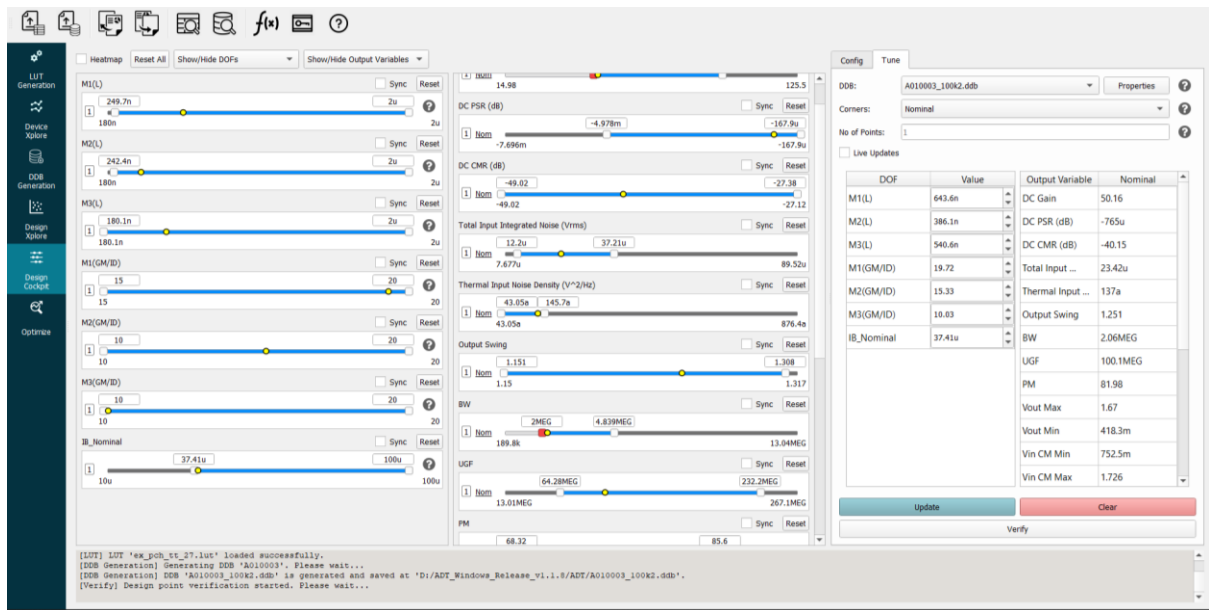

## Question2:

### Verifying Results

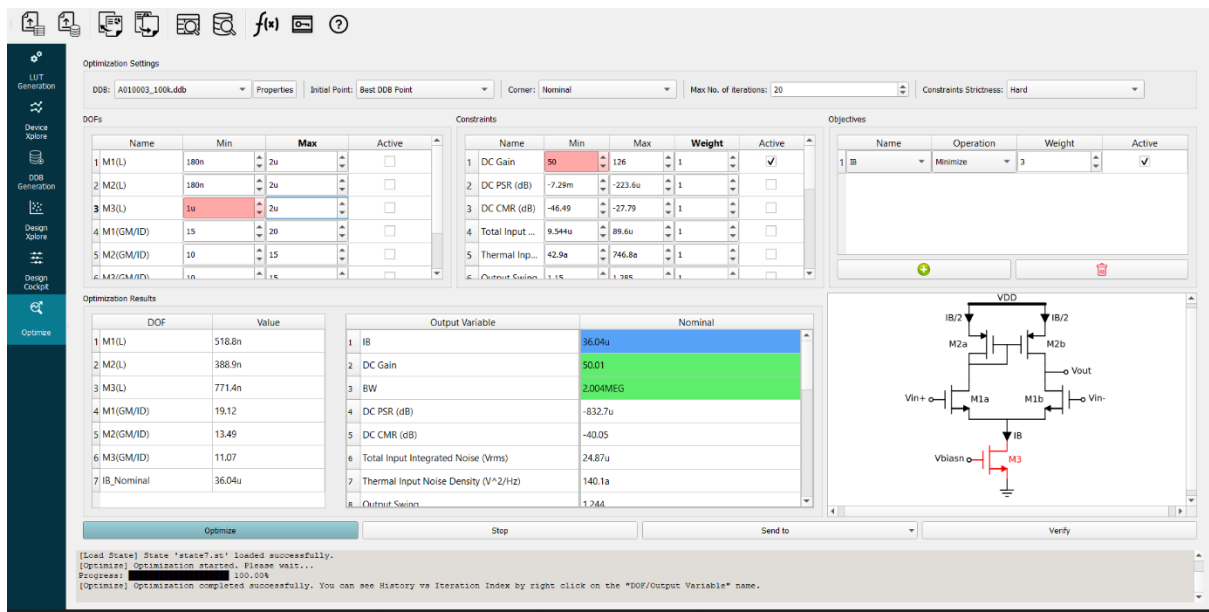

GBW=100Mega , Avdc=34db

## Question3:

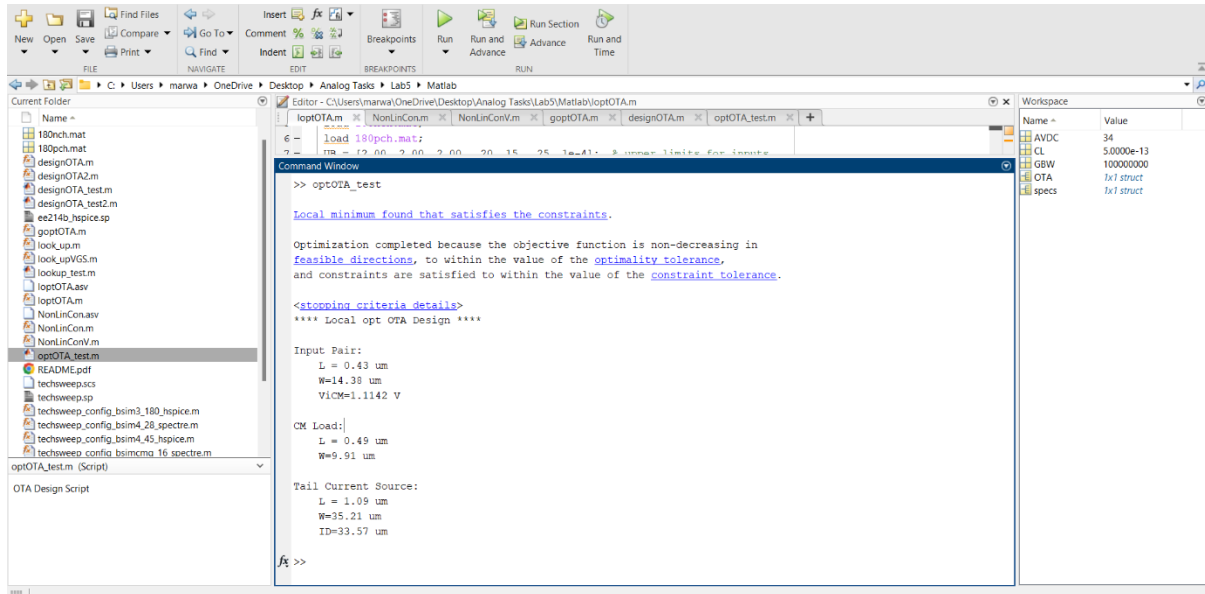

## Question4:

## Question5:

### Figure 1 Results .

### Figure 2 lopt function .

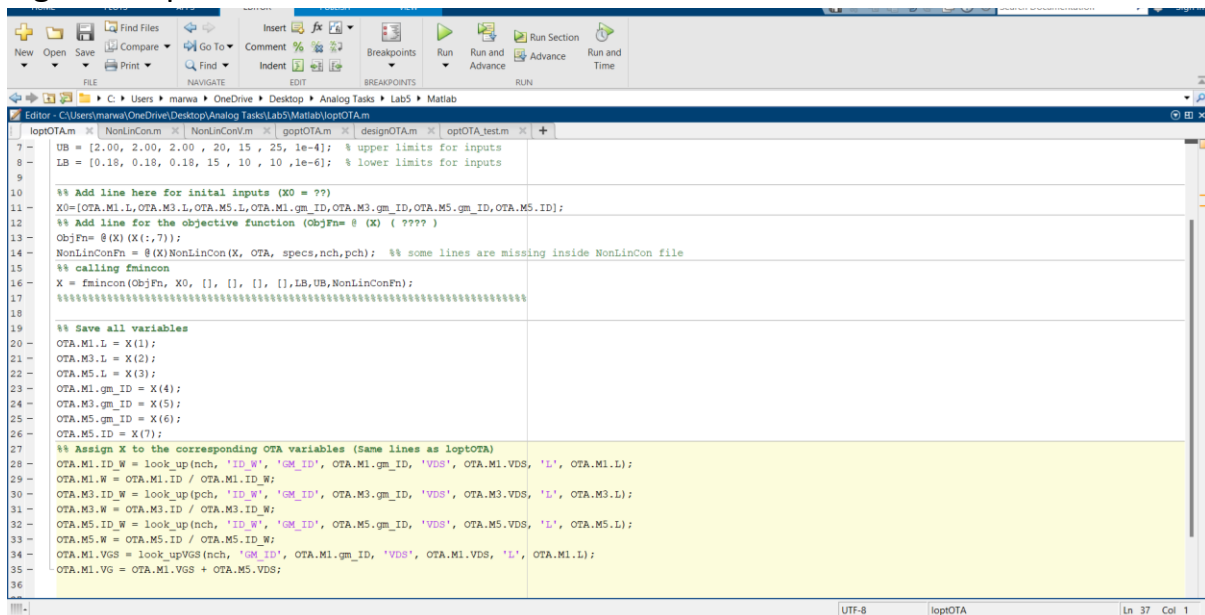

Figure 3 Nonlincon function .

```

4  %% add lines here relating OTA variables to X
5  %%
6  OTA.M1.L = X(1);
7  OTA.M3.L = X(2);
8  OTA.M5.L = X(3);
9  OTA.M1.gm_ID = X(4);
10 OTA.M3.gm_ID = X(5);
11 OTA.M5.gm_ID = X(6);
12 OTA.M5.ID = X(7);
13 OTA.M1.ID = 0.5*X(7);
14 OTA.M3.ID = 0.5*X(7);
15 OTA.M1.gm = OTA.M1.ID*OTA.M1.gm_ID;
16 OTA.M3.gm = OTA.M1.ID*OTA.M3.gm_ID;
17
18 OTA.M1.gds=look_up(nch, 'GM_GDS', 'GM_ID', OTA.M1.gm_ID, 'VDS', OTA.M1.VDS, 'L', OTA.M1.L);
19 OTA.M1.gds = OTA.M1.gm / OTA.M1.gm_gds;
20 OTA.M3.gds=look_up(pch, 'GM_GDS', 'GM_ID', OTA.M3.gm_ID, 'VDS', OTA.M3.VDS, 'L', OTA.M3.L);
21 OTA.M3.gds = OTA.M3.gm / OTA.M3.gm_gds;
22 OTA.M1.gm_cdd = look_up(nch, 'GM_CDD', 'GM_ID', OTA.M1.gm_ID, 'VDS', OTA.M1.VDS, 'L', OTA.M1.L);
23 OTA.M3.gm_cdd = look_up(pch, 'GM_CDD', 'GM_ID', OTA.M3.gm_ID, 'VDS', OTA.M3.VDS, 'L', OTA.M3.L);
24 OTA.M1.cdd=OTA.M1.gm/OTA.M1.gm_cdd;
25 OTA.M3.cdd=OTA.M3.gm/OTA.M3.gm_cdd;
26 C_total = OTA.M1.cdd+OTA.M3.cdd+specs.Cl;
27 %% add lines here to calculate specs AVDC_OUT , GBW_OUT
28 Rout=(OTA.M1.gds+OTA.M3.gds)^-1;
29 AVDC_OUT=OTA.M1.gm ^ Rout;
30 GBW_OUT=AVDC_OUT*(1/(Rout*C_total*2*pi));
31 CEQ = [];
32 C(1) = 10*(specs.AVDC / 20)/ double(AVDC_OUT) - 1;
33 C(2) = specs.GBW / double(GBW_OUT) - 1;

```

Question6:

Global Optimizer

Note : This Result isn't Correct but I can't find the bug in my code .

Command Window

```

18 - fprintf('Tail Current Source:\n');
Optimization terminated: average change in the fitness value less than options.FunctionTolerance
and constraint violation is less than options.ConstraintTolerance.
**** Global opt OTA Design ****

Input Pair:
L = 2.00 um
W=100.88 um
VicM=1.0492 V

CM Load:
L = 2.00 um
W=49.01 um

Tail Current Source:
L = 0.59 um
W=40.70 um
ID=55.13 um

```

```

12 ObjFn = @(X) X(1,7); %% vectorized objective function
13 NonLinConFn = @(X)NonLinConV(X, OTA, specs,nch,pch);

## Comment :

The Sizing Difference due to the added constrain in ADT for GBW = 100 mega , where added DCgain constrain and BW Constrain.

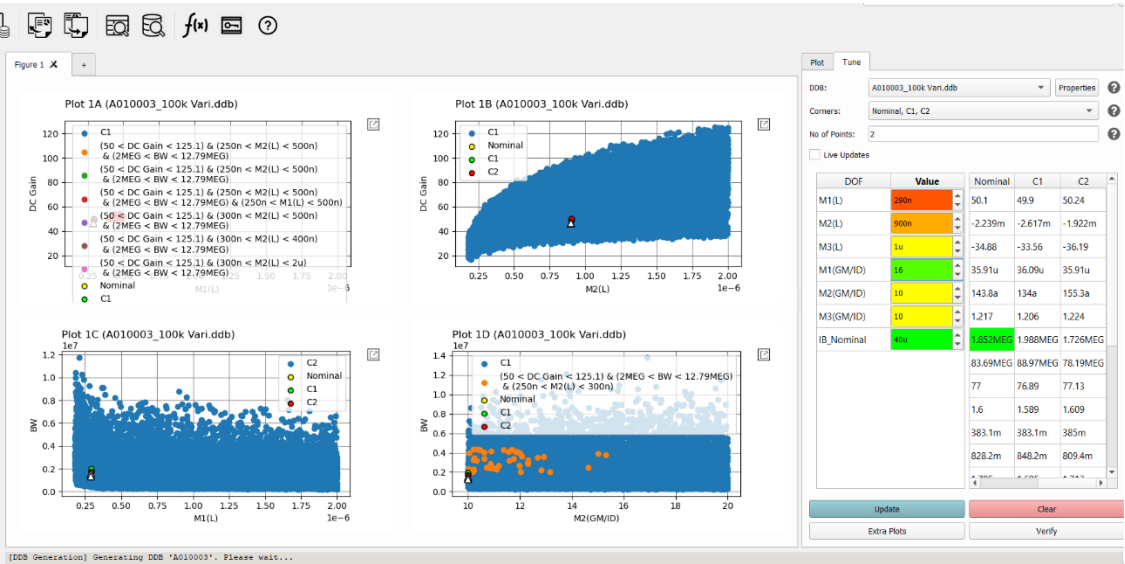

Question8:

PART2:

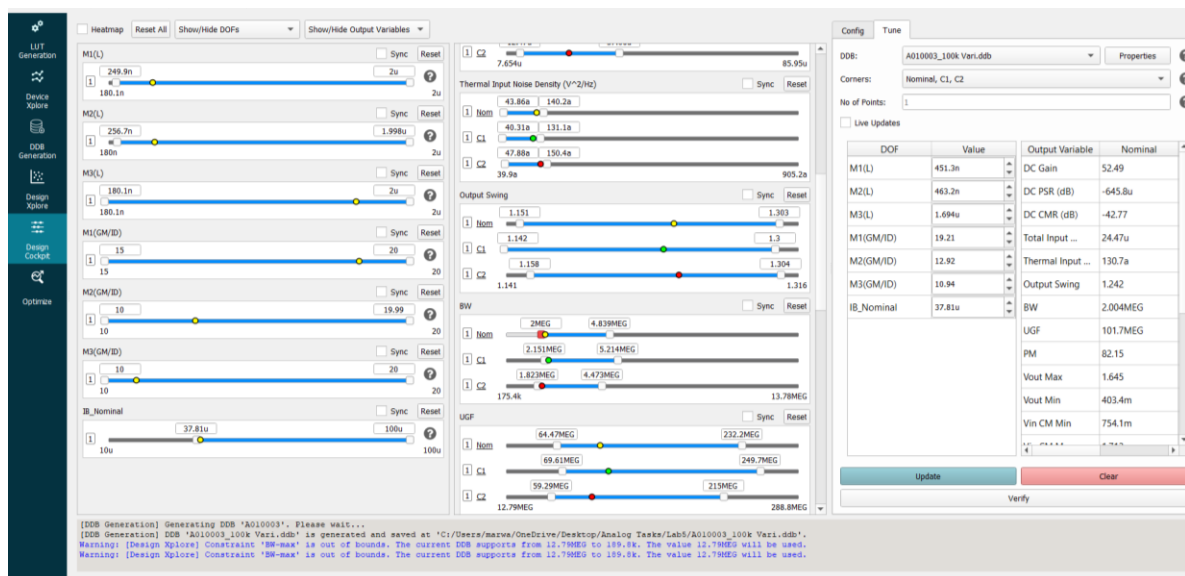

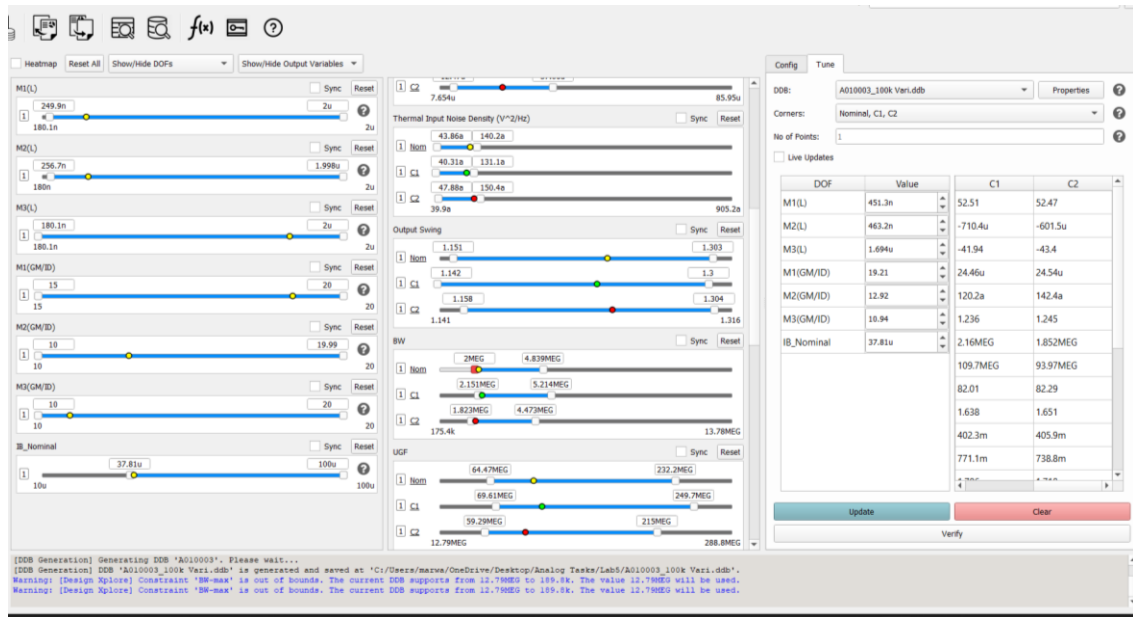

Question 1:

C1 is +10% C2 is -10%

## Question 2:

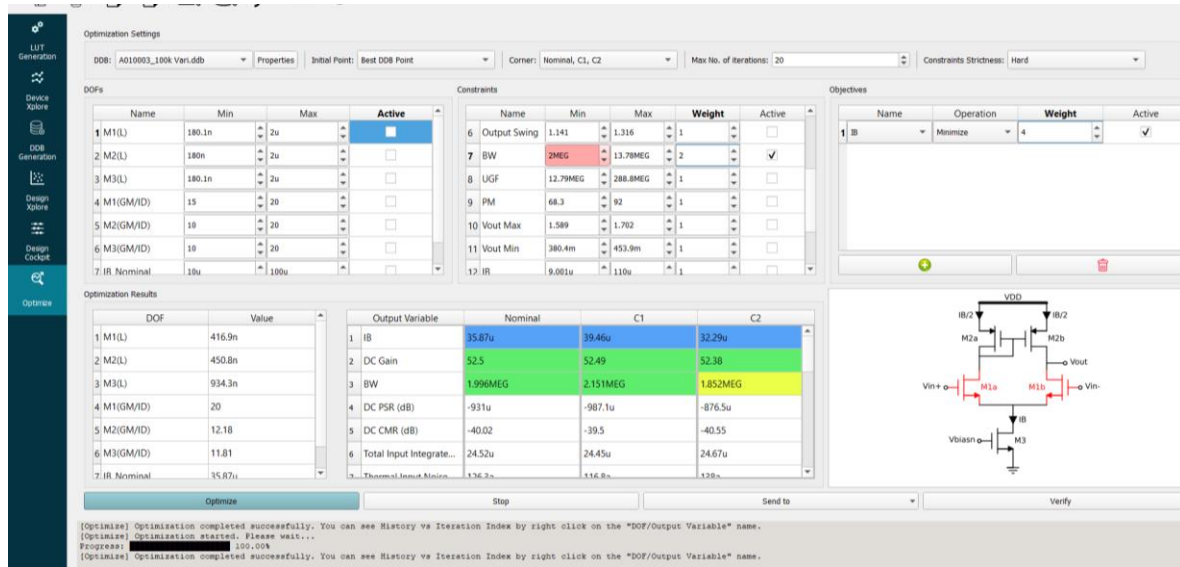

C1 is +10% C2 is -10%

### Question 3:

C1 is +10% C2 is -10%

### Question 4:

ADT Genrated a netlist for the nomninal Value only
